

**AFF 1/2" Drive 50-250 ft. lb.
Ratcheting Adjustable Torque Wrench**

Torque tools made to exacting standards using only superior materials and workmanship to ensure the highest productivity and performance standards.

- Easy to read dual scales allow for a wide range of torque applications
- Perceptible jolt and audible click indicate desired torque setting has been reached
- Locking collar allows easy setting of desired pre-torque and prevents accidental change of value while in use
- Comfortable non-slip grip handle is ideal for repeated use
- Rubber seal between the ratchet head and tube keeps lubrication in and contaminants out to ensure accuracy and repeatability

Only \$95.00 Available while supplies last

Tested at +/- 4% accuracy and includes Certificate of Calibration Conforms to the accuracy requirements of the American Standards Institute:

- ASME B107.14-1194
- BSEN 26789:1994
- ISO 6789-1992
- DIN 3122, and
- U.S. Government Specification GGG-W-00686C

Myers #	Model #	Drive Size	Primary Scale Range	Secondary Scale Range	Tooth Count	Head Thickness	Head Width	Overall Length	Ship Weight
801445	41053	1/2"	50-250 ft/lbs.	67-339 Nm	24	0.76	1.85	25.50"	5.60 lbs

**AFF 1/2" Drive 80 ft. lb.
Preset Torque Wrench**

- Individually tested and includes certificate of calibration
- Requires no adjustment of torque values before or after use
- Prevent incidental tampering of the torque value
- Pre-set to the most common settings and are ideal for production applications where only one torque value is needed.
- Color coded for easy identification
- Lightweight with ergonomic comfort grip
- Constructed with professional grade chrome vanadium steel for maximum durability and repeated use

Only \$45.00 Available while supplies last
