

Combines both 315 MHz and 433 MHz applications in one sensor

- **100% ID cloneable with no relearn required** - when the MX-Sensor is cloned with the original sensor ID and put in the same position
- **98% vehicle coverage** - sensor updates during installation from the AUTEL[®] wireless programming tool which gives the sensor the latest and most comprehensive vehicle coverage
- **1-Sensor to service nearly every TPMS equipped vehicle** means lower repair cost and higher install efficiency.
- **Maximum sensor signal strength** - allows AUTEL[®] sensor to be easily programmed wirelessly even when the sensors have already been mounted to the wheel
- **Lightweight** - 12g sensor weight makes it significantly lighter than most sensors in the market, which ensures better sensor stability and performance
- **AUTEL[®] quality control**  — each sensor is marked with a series number to track the sensor quality from the factory to ensure only the highest quality parts are installed

Unique snap-in configuration

#21604

(1) MX-Sensor with Snap-in-Valve

No tools needed for installation or removal

#21605

(4) Clamp-in-Valves for 21604

Warranty - Free from manufacturing defects for a period of 24 months or 24,000 miles, whichever comes first.
