VT31 TPMS Tool

TPMS Sensor Decoder and Activator for Domestic and European Resets

- Activates TPMS sensors to assist in resetting TPMS systems
- Easy to use, handheld unit with screen
- 100% vehicle coverage, up to 2020
- Displays all TPMS sensor info including sensor ID, frequency, temperature, battery, tire pressure
- Display data in English, Francais, Espanol

The VT31 TPMS Tool is a universal TPMS tool that is designed to activate tire pressure monitoring sensors up to the latest model year. Decode all sensor information including tire pressure, sensor ID, battery life, frequency (315, 433 MHz), and temperature. The tool has the ability to reset TPMS systems for Domestic and most European vehicles that require a manual or auto relearn procedure to transfer new or existing ID's to the ECU.

#VT31 KIT CONTENTS

- VT31 TPMS Tool
