

- **DURABILITY**

Heavy-duty rubber sleeve protects gauge from potential shop damage
Polymer coated braiding protects hose from kinking

- **ADVANCED ENGINEERING**

Patented backlit dial/needle improves visibility in low light conditions
Combination of digital and analog technology enables high accuracy of +/- 1%
Lightweight composite materials reduces user fatigue
Recalibration feature offers ability to easily recalibrate gauge

- **SAFETY**

Frequent and accurate tire pressure checks reduce risk of tire damage and accidents
Control valve stops inflation when trigger is released

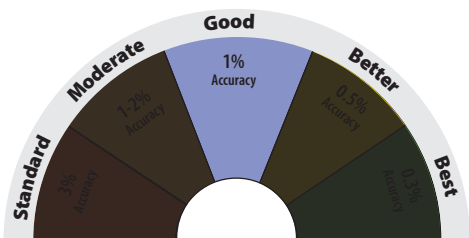

- **EASE OF USE**

Large easy-to-read analog dial enables quick and easy measurements
One trigger provides 3-way operation - inflate, deflate, and measure pressure without removing the chuck

- Heavy duty straight clip-on flow thru chuck
- Calibration: 10 - 170 psi
- Increments: 2 psi
- Air supply: ¼" FPT
- Hose length: 2'
- Dial diameter: 3"

#27304

Backlit dial/needle is easy to read in low light conditions
